

Four TFLOPS on your Desktop!

WhisperStation™ with NVIDIA® Tesla™ GPUs

Designed from the ground up for ultimate customer satisfaction, Microway's WhisperStation integrates the latest CPUs with NVIDIA Tesla GPUs. The massively multi-threaded Fermi GPU architecture, the CUDA™ C and FORTRAN language environments, and OpenCL™ provide stellar performance.

- ▶ Up to Four Tesla Fermi GPUs each with: 448 cores, 6 GB GDDR5, 1 TFLOP single and 515 GFLOP double precision performance
- ▶ Up to 24 cores with the newest Intel and AMD Processors, 128 GB memory, 80 PLUS® certified power supply, and eight hard drives
- ▶ NVIDIA Quadro for state of the art graphics
- ▶ Ultra-quiet fans, strategically placed baffles, and internal sound-proofing

Every Microway system is backed by pre and post sale techs who speak HPC. Whether it's graphics or GPGPU, FORTRAN or MPI, hardware problems or Linux kernel issues; you can talk to Microway's experts.
