

Double the Performance, Half the Price

48 AMD Opteron Cores in 1U – 24 Cores in a WhisperStation®

- ▶ Microway's new 1U QuadPuter® is the highest performing 4-way SMP platform available. With high efficiency power, four AMD Opteron 6100 Series processors and up to 512 GB of DDR3 memory, your demanding scientific applications will fly.
- ▶ WhisperStation is available with up to 24 AMD Opteron CPU cores, 128 GB DDR3 memory, high efficiency power, Solid State Drives, RAID and FireStream GPUs. This configuration provides the highest floating point throughput in a workstation that's as easy on your budget as it is on your ears.

The Microway Advantage: Custom Integrations and HPC Expertise Since 1982

Put our years of experience with Linux, Windows, multi-core processing and OpenCL to work for YOU!

Every Microway system is backed by pre and post sale techs who speak HPC. Whether it's graphics or GPGPU, FORTRAN, R or MPI, hardware problems or Linux kernel issues; you can talk to Microway's experts to design and support solutions for power hungry applications.

Configure your WhisperStation or Cluster today!
